

Rabia Soomro

Computer Systems Engineer

Khairpur Mir's, Pakistan | rabiasoomro1591@gmail.com | +923235969245 | [LinkedIn](#) | [GitHub](#)

SUMMARY

Computer Systems Engineering graduate from Sukkur IBA University with hands-on experience in AI, deep learning, data analysis, and full-stack web development. Demonstrated experience through internships, research publications, and impactful academic projects. Eager to contribute technical and analytical skills to AI/ML, software engineering, or data-driven roles while continuing to grow as a technology professional.

EXPERIENCE

Associate Data Analyst Intern

Jul 2025 – Aug 2025

Excelebrate · Virtual · Remote

- Applied PostgreSQL for exploratory data analysis, raw dataset validation, and structured master table creation via complex joins.
- Supported ETL pipeline by preparing well-documented outputs and delivering polished visualizations weekly.
- Awarded Star Performer badge, 93% 360° feedback score, and a \$1000 scholarship redeemed at Saint Louis University.

General Banking Internee

Jun 2025 – Jul 2025

National Bank of Pakistan · On-site · Khairpur Mir's, Pakistan

- Assisted in account management, financial documentation, and transaction verification.
- Developed practical knowledge of digital banking processes and customer service.

EDUCATION

- Sukkur IBA University**
- B.E. Computer Systems Engineering*

Sep 2022 – May 2026

CGPA – 3.83/4.00

PROJECTS

Skin Disease Identification using HQE Deep Learning Framework | Final Year Project

- Developed a deep learning-based skin disease classification system using ensemble learning and explainable AI techniques for improved prediction performance.

GPA & CGPA Calculator

- Developed a full-stack web application for GPA and CGPA management with performance tracking and data visualization features.

Real-Time Speech Recognition using MFCC & CNN

- Developed a speech recognition system using deep learning and audio feature extraction techniques for real-time voice processing.

Bank Networking System

- Designed and simulated a secure and scalable banking network infrastructure using networking and routing protocols.

Real-Time Speech Enhancement using Adaptive Spectral Gating

- Developed an audio enhancement system focused on noise reduction and speech clarity improvement using digital signal processing techniques.

SKILLS

- Programming: Python, C, SQL (PostgreSQL), HTML/CSS, JavaScript
- AI & Data: Machine Learning, Deep Learning, NLP, Computer Vision, Signal Processing, Data Analysis
- Tools & Frameworks: React, Node.js, Cisco Packet Tracer, Git/GitHub, Docker, Jira, Trello
- Soft Skills: Project Coordination, Stakeholder Communication, Agile, Leadership

CERTIFICATIONS

- Machine Learning Specialization – Coursera (DeepLearning.AI)
- AI For Everyone – Coursera
- Understanding AI & Data Science – Data Camp
- Spanish Language (Basic) – Coursera (4 Certificates)
- HTML FastTrack Bootcamp – MLSA Fabtech
